

Feature Guide

Marketing & product reference

For posters, reels, ads, sales pages and internal planning

Generated 2026-07-10

glow-uk.com · UK lash, nail & brow techs

Glow is the booking system built for self-employed UK lash, nail and brow techs — your page, your clients, zero commission.

A flat-fee (£19/mo), branded booking platform with beauty-specific rules built in: patch test gating, infill timing, deposits straight to your bank via Stripe Connect, automatic reminders, compliance records, and tools that protect your diary — without a marketplace poaching your regulars.

Audience: Self-employed lash, nail and brow technicians in the UK

Pricing: £9.50 first month, then £19/mo (or £180/year). 0% commission on all client payments.

How to use this guide

Each feature is structured the same way so you can lift content straight into marketing assets:

- Headline — bold text for posters, Reels cover, carousel slide 1
- Tagline — one sentence for captions, ad subcopy, email subject lines
- The problem — the pain point to open a video script or testimonial prompt
- What it is / How it works — product explainer copy and demo narration
- Key benefits — bullet slides, comparison tables, landing page sections
- Marketing hooks — ready-made social lines (edit to your voice)
- Where in Glow — for tutorials, onboarding content, and support docs

Part 8 at the end maps features to campaign themes (no-shows, patch tests, switching platforms, etc.).

Brand positioning pillars

Your money, your clients

No marketplace. No commission. Deposits and balances go to your bank via Stripe Connect. Clients book your branded page — not a directory next to your competitors.

Rules that understand beauty work

Patch tests, infills, product changes, reaction follow-ups — enforced automatically so bad bookings never land in your diary.

Admin that runs itself

Confirmations, reminders, balance links, aftercare, reviews, rebooking nudges, waitlist alerts, pre-care, and late-running cascades — sent without you chasing anyone.

Proof when it matters

Records, batches, reactions, consultation answers, and one-click evidence packs — built for insurers and claims, not just convenience.

Contents

Part 1: Your brand & booking page

The link in your bio — yours alone

- Branded public booking page
- Service menu, categories & add-ons
- Real-time availability
- Consultation forms
- Reviews on your page

Part 2: Smart booking rules

Stop bad bookings before they land

- Patch test gating
- Infill booking rules
- Blocked & flagged clients
- Booking approval
- Risk-tiered deposits (Feature 2)
- Paired patch test bookings (Feature 3)
- Loyalty discount & VIP
- Waitlist

Part 3: Payments & protection

Your money straight to your bank

- Stripe Connect — deposits to your bank
- Deposits & no-show protection
- Pay balance link
- Income & tax reports

Part 4: Automations & reminders

The admin you stopped doing

- Confirmations & 24h reminders
- Aftercare & review requests
- Rebooking nudge
- Infill deadline nudge (Feature 7)
- Pre-care confirmations (Feature 9)
- Running late cascade (Feature 8)
- 48-hour reaction check-in (Feature 5)

Part 5: Compliance & product safety

Stay insured. Prove it when it matters.

- Product-change re-flag (Feature 1)
- Product batches & reaction tracing (Feature 4)
- Evidence pack PDF (Feature 6)

Part 6: Growth, messaging & social selling

Turn DMs into bookings

- Client messaging
- DM quote links (Feature 12)
- Price rise assistant (Feature 11)
- Move to Glow — CSV import
- Referral programme

Part 7: Diary, calendar & day-to-day ops

Run the chair, not the spreadsheet

- Calendar & booking management
- Google Calendar sync
- Client profiles & photos
- Business insights
- Self Assessment tax pack (Feature 10)

Part 8: Campaign theme map

Poster and video series ideas grouped by message

- Encourages regular rebooking
- Works automatically — no manual checking

Glow Feature Guide · glow-uk.com · Page 9

MARKETING HOOKS — copy/paste for posts & scripts

- Infills for regulars only. Glow enforces it.
- No more 'can I just get an infill?' from brand-new clients.

WHERE IN GLOW

Dashboard !' Services !' Infill settings

VS COMPETITORS

Unique to Glow among major UK booking platforms

FEATURE 8 OF 37

Blocked & flagged clients

"Problem clients can't book you again online."

POSTER / REEL HEADLINE

Problem clients can't book you again online.

ONE-LINE CAPTION

Block list plus private warning notes and no-show badges on every profile.

THE PROBLEM

Repeat no-shows and difficult clients keep slipping back through online booking.

WHAT IT IS

Block a client from online booking, add a private warning note only you see, and track no-show count with visible badges.

HOW IT WORKS

Open the client in Dashboard !' Clients. Tick 'Block from booking online' or add a warning. Blocked clients hit a wall on your public page.

KEY BENEFITS

- Protect your diary without awkward confrontations
- See risk before you accept a manual booking
- No-show history follows the client

MARKETING HOOKS — copy/paste for posts & scripts

- Blocked means blocked — not 'we'll try to stop them'.
- See no-show history before you reply to a DM.

WHERE IN GLOW

Dashboard !' Clients !' Client profile

FEATURE 9 OF 37

Booking approval

"You approve before any deposit is taken."

POSTER / REEL HEADLINE

You approve before any deposit is taken.

ONE-LINE CAPTION

Manual or rules-based — new client at a weird hour? Your call.

THE PROBLEM

Auto-confirm means risky bookings are locked in before you've seen them.

WHAT IT IS

Booking requests can wait for your approval. Client gets a pending page; you approve or decline from the dashboard or email link.

HOW IT WORKS

Glow Feature Guide · glow-uk.com · Page 10

Turn on manual approval or rules mode in Settings. In rules mode, trusted returning clients auto-approve; new or risky ones wait for you.

KEY BENEFITS

- No surprise bookings
- Decline without refund hassle — no deposit taken yet
- Control without turning off online booking

MARKETING HOOKS — copy/paste for posts & scripts

- Approve or decline before money changes hands.
- New client, odd time slot? You decide.

WHERE IN GLOW

Dashboard !' Settings !' Booking approval · /approve/{token}

VS COMPETITORS

Most marketplaces auto-confirm; Glow gives you the gate

FEATURE 10 OF 37

Risk-tiered deposits (Feature 2)

"Bigger deposit when the risk is higher."

POSTER / REEL HEADLINE

Bigger deposit when the risk is higher.

ONE-LINE CAPTION

Low, medium and high risk tiers — deposit % scales automatically.

THE PROBLEM

A 30% deposit doesn't hurt a serial no-show enough.

WHAT IT IS

Glow scores each client (new, no-show history, warning notes, VIP status, visit count) and adjusts deposit % accordingly.

HOW IT WORKS

Set medium and high deposit tiers in Settings (e.g. 50% and 100%). Trusted regulars pay your normal deposit; flagged clients pay more.

KEY BENEFITS

- No-show protection that actually bites
- VIP and regulars aren't punished
- Works with rules-based approval

MARKETING HOOKS — copy/paste for posts & scripts

- Same booking page — smarter deposits for risky clients.
- Your regulars pay less. Repeat no-shows pay more.

WHERE IN GLOW

Dashboard !' Settings !' Protection policy

FEATURE 11 OF 37

Paired patch test bookings (Feature 3)

"Book the patch test and the treatment together."

POSTER / REEL HEADLINE

Book the patch test and the treatment together.

ONE-LINE CAPTION

One flow — test slot plus treatment slot, linked in the diary.

THE PROBLEM

Glow Feature Guide · glow-uk.com · Page 11

Clients book the treatment but forget the test, or book the test and never return.

WHAT IT IS

Mark a service as a patch test service. When a client needs a test, they book the test appointment and treatment appointment in one online flow.

HOW IT WORKS

Enable paired booking on qualifying services. The rules engine ensures correct lead time between test and treatment. Both appear in your calendar.

KEY BENEFITS

- Fewer dropped conversions
- Correct spacing enforced automatically
- Less admin chasing for the second booking

MARKETING HOOKS — copy/paste for posts & scripts

- Patch test + appointment in one booking — not two DMs.
- Stop losing clients between test day and treatment day.

WHERE IN GLOW

Dashboard !' Services !' Patch test service toggle

FEATURE 12 OF 37

Loyalty discount & VIP

"Reward your regulars automatically."

POSTER / REEL HEADLINE

Reward your regulars automatically.

ONE-LINE CAPTION

Discount after N visits — VIPs always qualify.

THE PROBLEM

Manually discounting loyal clients is easy to forget or inconsistent.

WHAT IT IS

Set a visit threshold and discount %. VIP-flagged clients always get the loyalty rate. Discount applies at online and manual booking.

HOW IT WORKS

Configure in Settings. Completed visit count is tracked per client. Discount shows in the booking total automatically.

KEY BENEFITS

- Retention without coupon codes
- VIP flag for your best clients
- Transparent pricing at checkout

MARKETING HOOKS — copy/paste for posts & scripts

- Your regulars get rewarded — automatically.
- Loyalty built in, not a spreadsheet.

WHERE IN GLOW

Dashboard !' Settings !' Loyalty · Client profile !' VIP

FEATURE 13 OF 37

Waitlist

"Fully booked? Capture the demand."

POSTER / REEL HEADLINE

Fully booked? Capture the demand.

ONE-LINE CAPTION

Clients join the list — emailed automatically when a slot opens.

THE PROBLEM

You turn people away when you're full and never hear from them again.

WHAT IT IS

When no slots are available, clients can join a waitlist for a specific date or any date. On cancellation, waiting clients get an email.

HOW IT WORKS

Client joins waitlist on the booking page. When you cancel a booking, Glow emails up to 10 waiting clients with a book-now link.

KEY BENEFITS

- Fill gaps without posting 'who wants it?' stories
- Capture demand you'd otherwise lose
- First-come urgency on opened slots

MARKETING HOOKS — copy/paste for posts & scripts

- Fully booked doesn't mean fully lost.
- Cancel a client — the waitlist fills the gap.

WHERE IN GLOW

Public booking page · Automatic on cancellation

PART 3

Payments & protection

Your money straight to your bank

Glow never holds client money. Stripe Connect sends deposits and balance payments directly to your bank. No-show and cancellation rules are enforced automatically.

FEATURE 14 OF 37

Stripe Connect — deposits to your bank

"0% commission. Straight to your bank."

POSTER / REEL HEADLINE

0% commission. Straight to your bank.

ONE-LINE CAPTION

Connect Stripe once — card payments land in your account, not ours.

THE PROBLEM

Platforms take commission and sometimes delay payouts.

WHAT IT IS

Stripe Connect onboarding in the dashboard. Clients pay deposits and balances by card; funds go to your connected bank account.

HOW IT WORKS

Dashboard !' Get paid !' Connect Stripe. Once verified, online bookings can take card deposits. Glow's subscription is separate — never a cut of client payments.

KEY BENEFITS

- 0% commission on every booking
- Professional card checkout for clients
- You own the Stripe relationship

MARKETING HOOKS — copy/paste for posts & scripts

- Your money. Your bank. Not ours.
- £19/mo flat — not 20% of your Instagram clients.
- Deposits included. No £40 plan upsell.

WHERE IN GLOW

Dashboard !' Get paid

VS COMPETITORS

vs Fresha 20% marketplace fee, Booksy Boost 30%

FEATURE 15 OF 37

Deposits & no-show protection

"Another no-show? Not on Glow."

POSTER / REEL HEADLINE

Another no-show? Not on Glow.

ONE-LINE CAPTION

Take a deposit on every booking. Forfeit on late cancel or no-show.

THE PROBLEM

No-shows and late cancellations mean working for free.

WHAT IT IS

Per-service deposit (% or fixed). Configurable cancellation window and no-show fee %. Deposits forfeit when rules are broken.

HOW IT WORKS

Set defaults in Settings, override per service. Mark no-show or cancel in Calendar — Glow applies forfeit/refund logic. No-show count increments on the client.

KEY BENEFITS

- Skin in the game for every client

- Automatic forfeit — no awkward chasing
- Clear policy shown at booking

MARKETING HOOKS — copy/paste for posts & scripts

- Stop working for free.
- Take a deposit. Set your window. Keep it when they no-show.
- Another no-show? Their deposit stays with you.

WHERE IN GLOW

Dashboard !' Settings · Dashboard !' Calendar !' Booking actions

FEATURE 16 OF 37

Pay balance link

"Get paid before they walk in."

POSTER / REEL HEADLINE

Get paid before they walk in.

ONE-LINE CAPTION

Clients pay the remaining balance from a secure link before the appointment.

THE PROBLEM

Chasing 'can you transfer the rest?' on the day is awkward and slow.

WHAT IT IS

Each booking has a balance due amount and a tokenised pay link. Sent automatically by reminder email/SMS.

HOW IT WORKS

After deposit, balance is tracked as unpaid/paid/refunded. Reminder scheduler sends the link before the appointment. You can also record cash/card in person.

KEY BENEFITS

- Less day-of payment friction
- Outstanding balance visible on dashboard home
- Card or cash — you choose

MARKETING HOOKS — copy/paste for posts & scripts

- Balance link in their inbox — not a awkward convo at the door.
- See what's still owed before they arrive.

WHERE IN GLOW

Dashboard !' Home (outstanding) · /pay/{token}

FEATURE 17 OF 37

Income & tax reports

"Self Assessment without the spreadsheet panic."

POSTER / REEL HEADLINE

Self Assessment without the spreadsheet panic.

ONE-LINE CAPTION

Income dashboard, CSV export, and UK tax-year PDF pack.

THE PROBLEM

January tax panic with payments scattered across apps and bank statements.

WHAT IT IS

Dashboard showing total income, deposits, balances, forfeited amounts, monthly breakdown, and per-service revenue. Export CSV or download a tax pack PDF per UK tax year.

HOW IT WORKS

Payments are recorded per booking. Reports page shows live totals. Tax pack PDF covers 6 April – 5 April with turnover and transaction list.

KEY BENEFITS

- One place for booking income
- Accountant-friendly export
- See no-shows and forfeited deposits separately

MARKETING HOOKS — copy/paste for posts & scripts

- Tax pack PDF in one click — not a Sunday night meltdown.
- Know what you earned without opening Stripe twelve times.

WHERE IN GLOW

Dashboard !' Income

PART 4

Automations & reminders

The admin you stopped doing

Glow chases clients so you can stay at the chair. Every automation runs on a 15-minute scheduler — confirmations, reminders, follow-ups, and compliance nudges.

FEATURE 18 OF 37

Confirmations & 24h reminders

"You didn't become a tech to text reminders at 10pm."

POSTER / REEL HEADLINE

You didn't become a tech to text reminders at 10pm.

ONE-LINE CAPTION

Booking confirmation instantly; day-before reminder by email and SMS.

THE PROBLEM

Manually reminding clients is exhausting and easy to forget.

WHAT IT IS

Automatic confirmation on book, 24-hour reminder before the appointment, optional 2-hour reminder, and balance request before the visit.

HOW IT WORKS

Reminders are scheduled when a booking is created. Cron runs every 15 minutes. Preview everything in Dashboard !' Reminders.

KEY BENEFITS

- Fewer no-shows
- Professional client experience
- SMS when platform is configured

MARKETING HOOKS — copy/paste for posts & scripts

- Confirmations and reminders — on autopilot.
- Fewer gaps. Fewer no-shows. More time at the chair.

WHERE IN GLOW

Dashboard !' Reminders

FEATURE 19 OF 37

Aftercare & review requests

"Aftercare sent the moment you tap Complete."

POSTER / REEL HEADLINE

Aftercare sent the moment you tap Complete.

ONE-LINE CAPTION

Aftercare email plus review request — no manual follow-up.

THE PROBLEM

You forget aftercare in the rush; clients forget to leave reviews.

WHAT IT IS

Per-service aftercare text emailed when you mark completed. Review request sent in the same flow.

HOW IT WORKS

Write aftercare in the service settings. Tap Completed on a booking — client gets aftercare and a star rating request.

KEY BENEFITS

- Consistent aftercare every time
- More reviews without asking in person
- Better retention and referrals

MARKETING HOOKS — copy/paste for posts & scripts

- Tap Complete. Aftercare and review request — done.

- Professional aftercare without copying the same message 20 times.

WHERE IN GLOW

Dashboard !' Services !' Aftercare · Dashboard !' Calendar

FEATURE 20 OF 37

Rebooking nudge

"Fill quiet weeks before they hurt."

POSTER / REEL HEADLINE

Fill quiet weeks before they hurt.

ONE-LINE CAPTION

Email lapsed clients 30+ days after their last visit — with opt-out.

THE PROBLEM

Regulars drift away and you only notice when the diary goes quiet.

WHAT IT IS

Automated 'time to rebook' email for clients whose last completed visit was 30–120 days ago with nothing booked ahead.

HOW IT WORKS

Cron identifies lapsed clients (max 25 per run). Email includes book-now link and PECR-compliant unsubscribe.

KEY BENEFITS

- Proactive retention
- Legal marketing opt-out built in
- No manual list checking

MARKETING HOOKS — copy/paste for posts & scripts

- Glow nudges clients to rebook — you stay at the chair.
- Quiet diary? Glow emails clients who've gone quiet.

WHERE IN GLOW

Automatic · Dashboard !' Reminders (preview)

FEATURE 21 OF 37

Infill deadline nudge (Feature 7)

"Remind them before the infill window closes."

POSTER / REEL HEADLINE

Remind them before the infill window closes.

ONE-LINE CAPTION

Automatic email before their infill eligibility runs out.

THE PROBLEM

Clients miss the infill window and expect a full set price anyway.

WHAT IT IS

After a completed full set or qualifying visit, Glow schedules a reminder before the infill deadline.

HOW IT WORKS

Triggered from completed bookings with infill services configured. Sends ahead of the deadline. Toggle in Settings.

KEY BENEFITS

- More regular infill bookings
- Less awkward 'you're too late for an infill' conversations
- Protects your pricing rules

MARKETING HOOKS — copy/paste for posts & scripts

- Infill window closing? Glow reminds them for you.
- Keep regulars on schedule — automatically.

WHERE IN GLOW

Dashboard !' Settings !' Infill nudges · Dashboard !' Reminders

FEATURE 22 OF 37

Pre-care confirmations (Feature 9)

"Prep instructions sent — with a confirmation tap."

POSTER / REEL HEADLINE

Prep instructions sent — with a confirmation tap.

ONE-LINE CAPTION

48 hours before: clients get pre-care and confirm they've read it.

THE PROBLEM

Clients arrive without following prep (no caffeine, no mascara, etc.) and results suffer.

WHAT IT IS

Per-service pre-care text. Sent 48h before the appointment. Client confirms via a one-tap link.

HOW IT WORKS

Add pre-care text on the service. Enable in Settings. Scheduler sends email/SMS with link to /precare/{token}. Confirmation logged on the booking.

KEY BENEFITS

- Fewer bad outcomes from poor prep
- Proof client received instructions
- Professional client experience

MARKETING HOOKS — copy/paste for posts & scripts

- Pre-care instructions — sent and confirmed before they arrive.
- No more 'I didn't know I wasn't supposed to...'

WHERE IN GLOW

Dashboard !' Services !' Pre-care · /precare/{token}

FEATURE 23 OF 37

Running late cascade (Feature 8)

"Running late? One tap — everyone notified."

POSTER / REEL HEADLINE

Running late? One tap — everyone notified.

ONE-LINE CAPTION

Email and SMS all remaining clients today with your message.

THE PROBLEM

Running 20 minutes late means individually messaging five clients while driving.

WHAT IT IS

One-tap panel on Home and Calendar. Enter minutes late and optional message. Glow notifies all remaining clients today by email and SMS.

HOW IT WORKS

Skips completed, cancelled, and no-show. 30-minute grace window prevents duplicate cascades. Logged for your records.

KEY BENEFITS

- Professional communication under stress

- Saves time on a bad day
- Clients appreciate the heads-up

MARKETING HOOKS — copy/paste for posts & scripts

- One tap. Every client today gets the message.
- Running late shouldn't mean five separate texts.

WHERE IN GLOW

Dashboard !' Home · Dashboard !' Calendar !' Running late?

FEATURE 24 OF 37

48-hour reaction check-in (Feature 5)

"Check they're fine after patch tests and tints."

POSTER / REEL HEADLINE

Check they're fine after patch tests and tints.

ONE-LINE CAPTION

Auto follow-up 48h later — client taps fine or reaction.

THE PROBLEM

Delayed reactions after tints and lifts go unreported until it's serious.

WHAT IT IS

After patch tests and chemical treatments, Glow schedules a 48h check-in. Client responds via /checkin/{token}. Reactions can be logged to their profile.

HOW IT WORKS

Created when you record a patch test or complete a qualifying treatment. Scheduler sends the link. Responses appear on Reminders and client profile.

KEY BENEFITS

- Early reaction detection
- Documented follow-up for insurance
- Shows duty of care

MARKETING HOOKS — copy/paste for posts & scripts

- 48 hours later — Glow asks if they're okay.
- Duty of care on autopilot.

WHERE IN GLOW

Dashboard !' Reminders · /checkin/{token}

PART 5

Compliance & product safety

Stay insured. Prove it when it matters.

Features 1, 4, 5, and 6 form Glow's compliance stack — built for UK insurers, product changes (including TPO transitions), and claims that need paperwork fast.

FEATURE 25 OF 37

Product-change re-flag (Feature 1)

"Switched products? Glow knows who needs re-testing."

POSTER / REEL HEADLINE

Switched products? Glow knows who needs re-testing.

ONE-LINE CAPTION

Log a product change — affected clients are flagged and notified.

THE PROBLEM

After a product switch, you don't know which clients still have 'valid' tests on the old formula.

WHAT IT IS

Log a product change event (by category or service). Valid patch tests in scope are invalidated. Affected clients enter a retest queue and get notified.

HOW IT WORKS

Services page !' Product change panel. Select scope, add note. Glow invalidates tests, builds retest queue, schedules notifications. Resolve when new pass is recorded.

KEY BENEFITS

- Ready for TPO/product transitions
- Insurer-aligned audit trail
- No spreadsheet of who needs re-testing

MARKETING HOOKS — copy/paste for posts & scripts

- Changing adhesive? Glow flags every client who needs a new patch test.
- The TPO ban is coming. Glow is already built for it.

WHERE IN GLOW

Dashboard !' Services !' Product change · Retest queue

FEATURE 26 OF 37

Product batches & reaction tracing (Feature 4)

"Know exactly which lot was on which client."

POSTER / REEL HEADLINE

Know exactly which lot was on which client.

ONE-LINE CAPTION

Log products, batch/lot numbers, and link usage to appointments and reactions.

THE PROBLEM

If there's a reaction, you can't remember which adhesive lot you used three weeks ago.

WHAT IT IS

Product library (adhesive, tint, lift, etc.) with batches (lot number, opened date, expiry). Log which batch was used on patch tests and appointments. Record adverse reactions linked to batches.

HOW IT WORKS

Add products and batches on Services page. When recording a patch test or reaction, select the batch. Usage history lives on the client profile.

KEY BENEFITS

- Traceability for insurance claims
- Batch-level reaction investigation
- Professional record keeping

- Which lot caused the reaction? Glow knows.
- Insurance wants records — not 'I think it was that one'.

WHERE IN GLOW

Dashboard !' Services !' Products & batches · Client profile

FEATURE 27 OF 37

Evidence pack PDF (Feature 6)

"One click. Full client file for a claim."

POSTER / REEL HEADLINE

One click. Full client file for a claim.

ONE-LINE CAPTION

PDF export: patch tests, forms, reactions, batches, bookings, check-ins.

THE PROBLEM

An insurer asks for records and you spend hours screenshotting profiles.

WHAT IT IS

Download a comprehensive PDF per client — patch test history, consultation answers, reactions, product usage, reaction check-ins, booking history, and photo count.

HOW IT WORKS

Client profile !' Evidence pack. PDF generates instantly with your branding and generation date.

KEY BENEFITS

- Claims-ready documentation
- Saves hours in a stressful moment
- Everything in one file

MARKETING HOOKS — copy/paste for posts & scripts

- Claim lands? One click — full evidence pack.
- Your insurance paperwork — already done.

WHERE IN GLOW

Dashboard !' Clients !' Evidence pack

PART 6

Growth, messaging & social selling

Turn DMs into bookings

Glow meets clients where they already are — Instagram, WhatsApp, TikTok — with messaging, quote links, and a booking page that closes the loop.

FEATURE 28 OF 37

Client messaging

"Client DMs — without giving out your personal number."

POSTER / REEL HEADLINE

Client DMs — without giving out your personal number.

ONE-LINE CAPTION

Private inbox per client. They chat via a link — no app download.

THE PROBLEM

Booking enquiries scattered across IG, WhatsApp, and SMS with no history.

WHAT IT IS

In-dashboard messaging inbox. Each client gets a private /m/{token} link. Unread badge on mobile nav.

HOW IT WORKS

Share the message link from the client profile or Messages. Conversations sync in the dashboard. Reply from your phone or desktop.

KEY BENEFITS

- One inbox for client chat
- History attached to the client record
- Professional boundary from personal WhatsApp

MARKETING HOOKS — copy/paste for posts & scripts

- One inbox for every client conversation.
- They message you from a link — not your personal number.

WHERE IN GLOW

Dashboard ! Messages · /m/{token}

FEATURE 29 OF 37

DM quote links (Feature 12)

"Quote in the DM. Book in one tap."

POSTER / REEL HEADLINE

Quote in the DM. Book in one tap.

ONE-LINE CAPTION

Generate a price quote with copy for Instagram/WhatsApp — client taps to book.

THE PROBLEM

You quote in DMs, they ghost, and you re-type the same message tomorrow.

WHAT IT IS

Build a quote (service, add-ons, price, deposit, note). Glow generates a link and ready-to-paste IG/WhatsApp text. Client opens /q/{token} and taps Book now.

HOW IT WORKS

Messages ! DM quote panel (or client thread). Create quote ! copy text ! send. Client lands on quote page with pre-filled booking.

KEY BENEFITS

- Faster DM-to-booking conversion
- Consistent pricing in writing
- Less re-typing the same quote

MARKETING HOOKS — copy/paste for posts & scripts

- Quote in the DM. Book in one tap.

WHERE IN GLOW

Dashboard !' Messages !' DM quote · /q/{token}

FEATURE 30 OF 37

Price rise assistant (Feature 11)

"Raising prices? Glow writes the announcement."

POSTER / REEL HEADLINE

Raising prices? Glow writes the announcement.

ONE-LINE CAPTION

Preview new prices, copy email/SMS/social text, bulk-apply rounded prices.

THE PROBLEM

Price rises are awkward to announce and tedious to update across every service.

WHAT IT IS

Enter % or £ increase, preview new prices (rounded to 50p), copy announcement for email/SMS/social, then bulk-apply to services.

HOW IT WORKS

Services page !' Price rise panel. Preview !' copy templates !' apply. Clients see new prices on the booking page immediately.

KEY BENEFITS

- Confident price rise communication
- Bulk update saves time
- Professional announcement copy included

MARKETING HOOKS — copy/paste for posts & scripts

- Putting your prices up? Glow helps you say it — and apply it.
- Price rise email written for you.

WHERE IN GLOW

Dashboard !' Services !' Price rise assistant

FEATURE 31 OF 37

Move to Glow — CSV import

"Switching from Fresha? Don't start over."

POSTER / REEL HEADLINE

Switching from Fresha? Don't start over.

ONE-LINE CAPTION

Import services, clients and appointments from Square, Booksy, Timely, Fresha.

THE PROBLEM

Fear of losing client history keeps techs on bad platforms.

WHAT IT IS

Three-step CSV import with preview before save. Platform-specific export guides in the dashboard.

HOW IT WORKS

Dashboard !' Move to Glow. Import services, then clients, then appointments. Preview shows what will be created vs skipped.

KEY BENEFITS

- Low-friction migration
- Keep your client list and history

- Support can help if you're stuck

MARKETING HOOKS — copy/paste for posts & scripts

- Moving off Fresha? Import in three steps.
- Your data is yours — coming and going.

WHERE IN GLOW

Dashboard !' Move to Glow

VS COMPETITORS

Glow imports from competitors; they don't import from Glow

FEATURE 32 OF 37

Referral programme

"Refer a tech. Get a free month."

POSTER / REEL HEADLINE

Refer a tech. Get a free month.

ONE-LINE CAPTION

Personal sign-up link in Billing — credit when they subscribe.

THE PROBLEM

Word of mouth is how techs find tools — but there's no reward.

WHAT IT IS

Each tech gets a referral link. When a referred tech becomes a paying member, you get a free month credited.

HOW IT WORKS

Share link from Dashboard !' My plan. Attribution tracked on sign-up. Credit applied to your subscription.

KEY BENEFITS

- Community-driven growth
- Reward for recommending Glow
- Helps other techs escape commission platforms

MARKETING HOOKS — copy/paste for posts & scripts

- Know a tech still paying commission? Refer them.
- Free month when your mate switches to Glow.

WHERE IN GLOW

Dashboard !' My plan

PART 7

Diary, calendar & day-to-day ops

Run the chair, not the spreadsheet

Everything you touch daily — calendar, manual bookings, Google sync, insights, and the tools that keep a busy day moving.

FEATURE 33 OF 37

Calendar & booking management

"Your whole diary in one place."

POSTER / REEL HEADLINE

Your whole diary in one place.

ONE-LINE CAPTION

Online and manual bookings — confirm, complete, cancel, no-show.

THE PROBLEM

Bookings split between paper diary, phone notes, and an app that doesn't sync.

WHAT IT IS

Full calendar view with booking detail, status changes, deposit/balance tracking, and manual booking creation.

HOW IT WORKS

Dashboard !' Calendar. Tap a booking for actions. Add manual bookings for walk-ins and phone bookings with the same rules and loyalty.

KEY BENEFITS

- Single source of truth
- Manual + online in one diary
- Status changes trigger automations

MARKETING HOOKS — copy/paste for posts & scripts

- One calendar. Every booking. Every status.
- Phone booking? Add it in 30 seconds.

WHERE IN GLOW

Dashboard !' Calendar

FEATURE 34 OF 37

Google Calendar sync

"Every booking in Google Calendar — automatically."

POSTER / REEL HEADLINE

Every booking in Google Calendar — automatically.

ONE-LINE CAPTION

Connect once. Create, update and cancel sync both ways.

THE PROBLEM

Copy-pasting appointments into Google Calendar doubles your admin.

WHAT IT IS

OAuth connection to Google Calendar. New bookings appear automatically; changes and cancellations sync.

HOW IT WORKS

Settings !' Connect Google Calendar !' Allow. Also provides iCal feed URL for Apple Calendar subscribers.

KEY BENEFITS

- One diary on your phone
- Partner/household can see your schedule
- No manual entry

MARKETING HOOKS — copy/paste for posts & scripts

- Connect Google Calendar once. Never copy-paste again.
- Your phone calendar and Glow — always in sync.

FEATURE 35 OF 37

Client profiles & photos*"Every client. Full history. One screen."***POSTER / REEL HEADLINE**

Every client. Full history. One screen.

ONE-LINE CAPTION

Visits, patch tests, photos, notes, reactions, messages — all linked.

THE PROBLEM

Client history scattered across phones, paper forms, and Instagram DMs.

WHAT IT IS

Rich client profiles with visit history, patch tests, consultation answers, uploaded photos (with consent), reactions, VIP/block status, and message link.

HOW IT WORKS

Clients are created on first booking or import. Everything they do accumulates on their profile. Photos stored securely with signed URLs.

KEY BENEFITS

- Continuity of care
- Before/after photo record
- Risk visible before you accept

MARKETING HOOKS — copy/paste for posts & scripts

- Open their profile — see everything.
- Not digging through WhatsApp for 'what tint did we use?'

FEATURE 36 OF 37

Business insights*"Know when your diary needs attention."***POSTER / REEL HEADLINE**

Know when your diary needs attention.

ONE-LINE CAPTION

Smart prompts on Home — quiet week, outstanding balances, no-show risk.

THE PROBLEM

You only realise the diary is empty when it's too late to fill it.

WHAT IT IS

Contextual insight cards on the dashboard home — e.g. quiet next 7 days, money still owed, clients with no-shows, top performing service.

HOW IT WORKS

Generated from live booking and payment data. Each insight links to the relevant dashboard area.

KEY BENEFITS

- Proactive business management
- Actionable — not just charts
- Helps newer techs know what to do next

- Glow tells you when to share your link or chase a balance.
- Insights that actually mean something.

FEATURE 37 OF 37

Self Assessment tax pack (Feature 10)

"Tax year PDF — turnover, breakdowns, every transaction."

POSTER / REEL HEADLINE

Tax year PDF — turnover, breakdowns, every transaction.

ONE-LINE CAPTION

UK tax year (6 Apr – 5 Apr) export for Self Assessment.

THE PROBLEM

HMRC wants numbers; you have Stripe, cash, and memory.

WHAT IT IS

Select tax year !' download PDF with turnover, monthly income, income by service, and full payment transaction list.

HOW IT WORKS

Income page !' tax year selector !' Tax pack PDF. Complements CSV export for accountants.

KEY BENEFITS

- Structured summary for Self Assessment
- Transaction-level backup
- Saves accountant fees and stress

MARKETING HOOKS — copy/paste for posts & scripts

- Self Assessment tax pack — one PDF, whole year.
- January panic? Not this year.
